17) A hallmark of the SRLN community is that we share and learn from one another by intentionally making time to problem-solve. At SRLN2024, we hope to make time each day for themed problem solving. These sessions will have identified facilitators, but the discussion will be driven by the participants. The goal is to help you and your colleagues build relationships, share perspectives and gain insights and ideas to help address the challenges or problems your project or program might be facing. In this section, please propose challenges or problems that you would like the opportunity to discuss with colleagues.

Please offer SPECIFIC topics that will allow colleagues to engage in a practical and useful way. If you would like to nominate yourself or another person as a facilitator, please do, but that is not required. We will not disclose who made recommendations for sessions or facilitators.

17a) What theme(s) would you like to see featured or what questions posed in a Problem-Solving Session?

17b) Who, if anyone, would you like to recommend to facilitate? You can suggest more than one person.

17c) Please add any other comments/suggestions you have for the Problem-Solving sessions.

18) Final Comments - Please share anything else you think we should know.
